

b.) Amendment to the Claims:

1. (Currently Amended) ~~An agent for preventing and/or treating higher brain dysfunction~~ A pharmaceutical composition comprising, as an active ingredient, a xanthine derivative represented by formula (I):

[wherein

$R^1$ ,  $R^2$  and  $R^3$  ~~are the same or different, and~~ independently represent a hydrogen atom, lower alkyl, lower alkenyl or lower alkynyl;

$R^4$  represents cycloalkyl,  $-(CH_2)_n-R^5$  (wherein  $R^5$  represents substituted or unsubstituted aryl, or substituted or a unsubstituted heterocyclic group; and n represents an integer of 0 to 4) or a group represented by formula (II):

(wherein  $Y^1$  and  $Y^2$  ~~are the same or different, and~~ independently represent a hydrogen atom, halogen or lower alkyl; and Z represents substituted or unsubstituted aryl or a substituted or unsubstituted heterocyclic group);

~~X<sup>1</sup> and X<sup>2</sup> are the same or different, and~~ independently represent an oxygen atom or a sulfur atom]

or a pharmaceutically acceptable salt thereof

together with a pharmaceutically acceptable carrier.

2. (Currently Amended) ~~The agent for preventing and/or treating higher brain dysfunction~~ composition according to claim 1, wherein X<sup>1</sup> and X<sup>2</sup> each is an oxygen atom.

3. (Currently Amended) ~~The agent for preventing and/or treating higher brain dysfunction~~ composition according to the claim 1 or 2, wherein R<sup>4</sup> is ~~a group~~ represented by formula (II):

~~(wherein Y<sup>1</sup>, Y<sup>2</sup> and Z each have the same meanings as defined above).~~

4. (Currently Amended) ~~The agent for preventing and/or treating higher brain dysfunction~~ composition according to claim 3, wherein Y<sup>1</sup> and Y<sup>2</sup> are both hydrogen atoms.

5. (Currently Amended) ~~The agent for preventing and/or treating higher brain dysfunction~~ composition according to claim 3 ~~or~~ 4, wherein Z is substituted or unsubstituted aryl or a group represented by formula (III):

(wherein R<sup>6</sup> represents a hydrogen atom, hydroxy, lower alkyl, lower alkoxy, halogen, nitro or amino; and m represents an integer of 1 to 3).

6. (Currently Amended) ~~The agent~~ A method for preventing and/or treating ~~higher brain dysfunction according to any one of claims 1 to 5, wherein the higher brain dysfunction is a higher brain dysfunction caused by brain injury comprising~~ administering an effective amount of the composition according to claim 1 to a patient in need thereof.

7. (Currently Amended) The ~~agent for preventing and/or treating higher brain dysfunction~~ method according to claim 6, wherein the brain injury is a ~~brain injury~~ due to aging.

8. (Currently Amended) The ~~agent for preventing and/or treating higher brain dysfunction~~ method according to claim 6, wherein the brain injury is a ~~brain injury~~ due to a disorder selected from the group consisting of head trauma and cerebrovascular accident.

9. (Currently Amended) The ~~agent for preventing and/or treating higher brain dysfunction~~ method according to any one of ~~claims 1 to 8~~ claims 6 to 8, wherein the higher brain dysfunction is an impairment of higher brain function selected from the group consisting of memory, thinking, recognition, action and learning.

10. (Currently Amended) The ~~agent for preventing and/or treating higher brain dysfunction~~ method according to any one of ~~claims 1 to 8~~ claims 6 to 8, wherein the higher brain dysfunction is a ~~brain dysfunction~~ selected from the group consisting of agnosia, amnesia and apraxia.

11. (Currently Amended) The ~~agent for preventing and/or treating higher brain dysfunction~~ method according to any one of ~~claims 1 to 8~~ claims 6 to 8, wherein the higher brain dysfunction is a memory impairment.

12. (Currently Amended) The ~~agent for preventing and/or treating higher brain dysfunction~~ method according to any one of ~~claims 1 to 8~~ claims 6 to 8, wherein the higher brain dysfunction is a learning impairment.

Claim 13 (Cancelled).

14. (Currently Amended) ~~Use of~~ A method of producing a pharmaceutical composition comprising the steps of selecting a xanthine derivative represented by formula (I):

[wherein ~~R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, R<sup>4</sup>, X<sup>1</sup> and X<sup>2</sup>~~ each have the same meanings as defined above R<sup>1</sup>, R<sup>2</sup> and R<sup>3</sup> independently represent a hydrogen atom, lower alkyl, lower alkenyl or lower alkynyl;

R<sup>4</sup> represents cycloalkyl, -(CH<sub>2</sub>)<sub>n</sub>-R<sup>5</sup> (wherein R<sup>5</sup> represents substituted or unsubstituted aryl, or substituted or a unsubstituted heterocyclic group; and n represents an integer of 0 to 4) or a group represented by formula (II):

(wherein Y<sup>1</sup> and Y<sup>2</sup> independently represent a hydrogen atom, halogen or lower alkyl; and Z represents substituted or unsubstituted aryl or a substituted or unsubstituted heterocyclic group);

X<sup>1</sup> and X<sup>2</sup> independently represent an oxygen atom or a sulfur atom]

~~or a pharmaceutically acceptable salt thereof for the manufacture of an agent for preventing and/or treating higher brain dysfunction; and~~

admixing said xanthine derivative or pharmaceutically acceptable salt with a pharmaceutically acceptable carrier.

15. (New) The composition according to claim 4, wherein Z is substituted or unsubstituted aryl or a group represented by formula (III):

(wherein R<sup>6</sup> represents a hydrogen atom, hydroxy, lower alkyl, lower alkoxy, halogen, nitro or amino; and m represents an integer of 1 to 3).
